COMPTTEL

As a world-class vendor of telecom software solutions, Comptel helps operators take control of their networks and deliver the kind of innovative services their subscribers demand. In this fast-paced and dynamic environment, Comptel has delivered winning solutions to 280 customers with 800 million subscribers in 85 countries. Comptel's headquarters are located in Finland and the company is listed on NASDAQ OMX in Helsinki. Group net sales were EUR 85 million in 2008. We are a global team of 600 professionals in 20 countries. For more information, visit www.comptel.com

Technical writer

We are looking for a skilled Documentation Specialist to join our Documentation Competence Center as a maternity substitute for 1 year to be based in Oslo.

As a Document Specialist you would work closely with our product development professionals having a vital role in our product development projects. Your tasks include planning, creating and updating customer documentation. You are also interested in improving existing documentation methods and processes.

We expect you to have at least two years of technical writing experience from software projects, and you already have knowledge of the telecommunications business area. You have a university degree or other higher technical education degree, majoring in English or technology. University level studies of technical writing are an asset. You write excellent English and have good knowledge of Word, Acrobat, RoboHelp, FrameMaker and the most common graphics tools. You have very good interpersonal and communication skills, and want to work as a responsible member of a documentation team. Experience from working in an agile development environment is a plus.

We offer you a position in a successful international company and an excellent working environment, including exciting possibilities to further develop your competence.
